PROFESSIONAL SUMMARY

Recent Computer Science graduate with hands-on experience in **AI-powered applications** and **backend development**. Built and deployed an **AI Resume Analyzer** using **Google Gemini API** for structured data extraction from PDFs. Currently building a **Job Tracker & AI Matching Platform** with JWT authentication, PostgreSQL, and planned LLM integration. Strong foundation in **Python, FastAPI, REST APIs, and prompt engineering**. Eager to grow in AI/ML, LLMs, and production AI systems.

TECHNICAL SKILLS

AI / ML	Google Gemini API, Prompt Engineering, AI Pipeline Integration, Structured Output Extraction
Programming	Python (Intermediate), SQL, JavaScript, Java, C/C++
Backend	FastAPI, Django, REST APIs, JWT Authentication
Databases	PostgreSQL, SQLite, SQLAlchemy, SQL
Tools & Web	Git, GitHub, VS Code, Postman, Linux (Basic), HTML, CSS, JavaScript, React (Basic)

AI / ML PROJECTS

Resume Analyzer — AI-Powered Resume Parsing FEATURED

FastAPI, Google Gemini API, PyPDF2, SQLite, HTML/CSS/JS, Railway

- Built an **AI-powered web application** that extracts structured data (name, email, skills, experience, education) from PDF resumes.
- Integrated **Google Gemini API** for LLM-based text extraction and designed **prompt engineering workflows** for reliable structured output.
- Implemented **background task processing** for AI analysis without blocking client requests and deployed live on Railway.

GitHub: github.com/Jay5566170/resume-analyzer

Job Tracker & AI Matching Platform IN PROGRESS

FastAPI, PostgreSQL, SQLAlchemy, JWT, Google Gemini API (planned)

- Building a full-stack web app that tracks job applications and matches resumes to job descriptions using AI.
- Backend foundation complete: **4-table database schema**, **JWT authentication**, and **Pydantic validation**.
- Planned features: AI-powered resume matching, embeddings, vector search, and job description parsing.

OTHER PROJECTS

Student Manager API — Production Backend

FastAPI, PostgreSQL, SQLAlchemy, JWT, Docker

- Built a complete REST API with full CRUD operations, JWT authentication, optimized database queries, and deployed live on Railway.

GitHub: github.com/Jay5566170/student-manager

E-Testing System — Full-Stack Platform (FYP)

Django, DRF, React, SQLite, JWT

- Team project online examination platform. Contributed to system architecture, API documentation, and end-to-end testing.

GitHub: github.com/Jay5566170/E-Testing-Services

AI / ML FOUNDATIONS

Topic	Exposure / Level
Google Gemini API	✓ Built production project
Prompt Engineering	✓ Structured extraction prompts
AI Pipelines	✓ End-to-end file → AI → DB flow
LLM Applications	✓ Hands-on with Gemini
RAG & Vector Databases	📖 Active learning & practice

STRENGTHS & CERTIFICATIONS

- Strong problem-solving and debugging skills
- Hands-on with AI APIs and prompt engineering
- Self-directed learner through real-world projects
- Comfortable working EST hours (5:00 PM – 2:00 AM)
- **Certifications:** AI/ML Specialization — Coursera (In Progress)

EDUCATION

BS Computer Science

COMSATS University Islamabad,
Abbottabad Campus (2022 – 2026)

Relevant Coursework:

- Artificial Intelligence
- Machine Learning
- Data Structures & Algorithms
- Databases & SQL
- Software Engineering

LANGUAGES & AVAILABILITY

Languages:

English (Fluent) | Urdu (Fluent) | Pashto (Native)

Availability:

- Available immediately for onsite internship
- Based in Barkat Market, Lahore (easy commute)
