PROFESSIONAL SUMMARY

Recent BS Computer Science graduate with genuine full-stack experience — FastAPI and Django backends, React front-ends, relational database design, and live AI integrations, deployed and working in production, not just coursework. Built and deployed a full-stack AI-powered job tracking platform (auth, CRUD, resume parsing, and AI-driven resume-to-job matching) end to end. Comfortable across Python, JavaScript, and SQL, with a habit of testing and verifying systems rather than assuming they work. Fast learner, ships things independently, and looking to bring that range to a software engineering role.

TECHNICAL SKILLS

Backend	Python, FastAPI, Django, Django REST Framework, REST API design, JWT authentication
Front-End	JavaScript, React, HTML5, CSS3
Databases	PostgreSQL, MySQL, SQLite — schema design, queries, relational data modeling
AI / Applied	OpenAI API and Google Gemini API integrations; AI-powered matching and data extraction, shipped in production
Deployment & Tools	Vercel, Git, GitHub
Other Languages	Java, C/C++, C#

RELEVANT COURSEWORK

Data Structures & Algorithms · Object-Oriented Programming · Database Systems · Software Engineering Concepts · Artificial Intelligence · Design & Analysis of Algorithms

PROJECTS

Job Tracker & AI Matching Platform

Live — job-tracker-jay55666170.vercel.app

- Built and deployed a full-stack job tracker: FastAPI + PostgreSQL backend, React frontend, user auth, and job CRUD (manual, URL, or pasted text).
- Built AI-powered resume matching (Google Gemini API): percentage match score, matching vs. missing skills, and a written recommendation.
- Built resume upload with automatic AI-driven skill extraction; owned the full engineering cycle solo end to end.

Resume Analyzer — Full-Stack AI Application

Personal Project

- Built solo, end to end: FastAPI backend, PostgreSQL database, PDF parsing, file uploads, and a live OpenAI API integration.

E-Testing System — Web-Based Online Examination Platform

Final Year Project

- Designed system architecture, backend logic, and relational database schema for a full-stack exam platform automating result processing.
- Diagnosed and fixed a state-sync bug through systematic root-cause debugging, then verified the fix under original failure conditions.

Student Manager — Python + SQLite CRUD App

Personal Project

- Built a command-line application with a SQLite-backed relational schema and full CRUD operations using parameterized SQL queries.

EDUCATION

BS Computer Science — COMSATS University Islamabad, Abbottabad Campus

2022 – 2026

LANGUAGES

English (Fluent, IELTS 6.5) · Urdu (Fluent) · Pashto (Native) · German (Basic) · Arabic (Basic)

AVAILABILITY

Available immediately for full-time work in Lahore.
